EXPERIMENT

Title

Description

Alice has a mathematics test for which she is underprepared. She has to do at least one question correctly to pass the test. He decides to do a question which needs her to find the smallest prime number which is larger than a given integer N. Your task is to find and return an integer value representing the smallest prime number larger than N.

Input Format:

input1: An integer value N

Output Format:

Return an integer value representing the smallest prime number larger than N.

Sample Input

Sample Output

7

Source Code:

```
n=int(int(input))
num=n+1
while True:
    is_prime=True
    if num>1
       for i in range(2,int(num**0.5)+1):
           if num%i==0:
               is_prime=False
               break
           if is_prime:
               print(num)
               break
    num+=1
```
